Overview

1. Challenges in Enrollment Data Management
2. RNL Insights
3. Live in Action
4. Q&A

Challenges in Enrollment Data Management

- Time constraints
- Specialized knowledge and training needed
- Data changes frequently

RNL Insights

Instant Responses

- Get immediate insights and strategies tailored to your specific needs
- Spend less time on data and building reports and more time on strategic initiatives

100x

Faster than current
data warehouses

Have a Conversation with Your Data

- No need to be a data expert. Just ask your questions in plain language using our easy-to-use chat tool
- Get insights from your data without running queries or digging through dashboards

The screenshot shows a chat interface titled "RNL Insights". At the top right, there are tabs for "Response" (active) and "Data (Beta)". Below the title, a link "Analysis Request Breakdown" is visible. The main chat area contains a message from the assistant: "Hi RNL University, I am your personal Data Analyst. I am able to access a dataset focused on enrollment and prospective students outreach. I have gone ahead and already analyzed some of your data and have a few key insights to draw your attention to!". Below the message is a "Read more" link and a downward arrow icon. The interface then displays four suggested questions in a grid: "show me enrollments by major as a bar chart for fall 2024", "performance for fall 2024", "show the trend for prospect sources in terms of number of enrollments for fall 2024", and "show the number of admits by gender and country for fall 2024". At the bottom, there are two input fields: "Ask a new question" and "Ask a follow-up question" (which includes a right arrow icon). A footer note says "Type @ to search for metrics and segments".
